PROFESSIONAL SUMMARY

Aspiring Data Analyst with a Master's in Data Science and hands-on experience in data cleaning, exploratory analysis, dashboard development, and predictive modeling. Proficient in Python, SQL, and Power BI, with a track record of designing end-to-end analytics solutions - from data pipelines to executive dashboards - that turn raw data into actionable business insights. Built and deployed a live portfolio of five production-style analytics projects.

EXPERIENCE

Data Analyst Intern — Own Techno Jan 2025 - Dec 2025

- Analyzed business and sales data using Excel and SQL to identify trends and generate actionable insights for stakeholders.
- Built and maintained interactive Power BI dashboards to track key performance metrics and support data-driven decision-making.
- Performed data cleaning, validation, and reporting to ensure accuracy and reliability of business data.

CORE SKILLS

Data Analysis & Modeling: Python (Pandas, NumPy, Scikit-learn), Statistical Analysis, Predictive Modeling, Exploratory Data Analysis

Query & Database: SQL, MySQL, PostgreSQL, NoSQL Fundamentals

Data Visualization & BI: Power BI (DAX, KPI Design, Dashboarding), Tableau, MS Excel, Matplotlib, Seaborn, Chart.js

Data Engineering & Automation: Apache Kafka, Docker, ETL Pipelines, Workflow Automation

Programming: Python, SQL, Java, JavaScript, Basic React.js

KEY PROJECTS

E-Commerce Sales Analytics — Business Intelligence 2025

- Designed a multi-tab analytics dashboard (overview, customers, products, platforms, profitability) analyzing 6,000 customers, 320 products, and 34,185 orders across sales platforms.
- Built revenue, margin, LTV/CAC, and return-rate visualizations that revealed marketplace commissions changed profitability rankings even when a platform led on raw revenue.

Tools: SQL, Python, Power BI, Data Visualization

Real-Time Sales Analytics (PULSE) — Data Engineering 2025

- Designed a Kafka-based streaming pipeline where POS and web events flow through a Python consumer for validation and enrichment, landing in PostgreSQL and surfacing in a Power BI-style DirectQuery dashboard.
- Delivered a live-updating dashboard tracking revenue, orders, average order value, and conversion rate with sub-15-second refresh on streaming transaction data.

Tools: Apache Kafka, Python, SQL, Docker, Power BI

Financial Performance Dashboard (Ledger) — Business Intelligence 2025

- Built a SQL-based fact and dimension data model feeding DAX measures (Net Margin %, YoY Growth) to eliminate manual spreadsheet reconciliation for finance teams.
- Delivered a live financial dashboard covering revenue vs. expenses vs. profit trends and period-by-period ledger detail, with support for connecting CSV, Excel, or live API data.

Tools: Power BI, SQL, DAX, JavaScript, Chart.js

Sales Dashboard in Power BI — Business Intelligence 2024

- Designed and deployed a live Power BI dashboard tracking 8 sales KPIs - revenue, profit, orders, region, category, growth, returns, and target achievement - for fast business review.

Tools: Power BI, React, KPI Design, Dashboarding

HR CV Shortlister — AI / HR Tech 2024

- Built a Python automation tool to structure candidate evaluation and compare role fit, reducing manual resume screening time by up to 40% by prioritizing role-fit signals ahead of manual review.

Tools: Python, Automation, Resume Screening, HR Analytics

EDUCATION

Master of Computer Applications (MCA) - Data Science 2023 - 2025
Babu Banarasi Das University, Lucknow

Bachelor of Computer Applications (BCA) - Computer Science 2020 - 2023
Veer Bahadur Singh Purvanchal University
